Patent No. 5679509

GENERAL INFORMATION:

APPLICANT: Wheeler, Cosette M.

APPLICANT: Parmenter, Cheryl A.

TITLE OF INVENTION: Methods and a Diagnostic Aid for

TITLE OF INVENTION: Distinguishing a Subset of HPV that is Associated with an

TITLE OF INVENTION: Increased Risk of Developing Cervical Dysplasia and

TITLE OF INVENTION: Cervical Cancer
Sequence 14, Application US/08860165A
Patent No. 6004557

Sequence 22, Application US/10476570

Publication No. US20040170644A1

GENERAL INFORMATION:

APPLICANT: COMMISSARIAT A L'ENERGIE ATOMIQUE

APPLICANT: INSTITUT NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDIC:

APPLICANT: MAILLERE, Bernard

APPLICANT: MOURCAULT-VILLADA, Isabelle

APPLICANT: GUILLE MORATULLE, Sandra

APPLICANT: GUILLE, MORATULLE, Sandra

APPLICANT: GUILLE, Dean-Gerard

TITLE OF INVENTION: Mixture of peptides derived from E6 and/or E7

TITLE OF INVENTION: papillomavirus proteins and uses thereof

FILE REFERENCE: 45636-5071-US

CURRENT APPLICATION NUMBER: US/10/476,570

CURRENT FILING DATE: 2003-11-04
                                                                                                                                                                                                                                                                                                     뭉

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   SOFTWARE: PastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         LENGTH: 273
TYPE: PRT
ORGANISM: Artificial Sequence
PEATURE:
OTHER INFORMATION: Chimaeric protein (protein D from Haemophilius
OTHER INFORMATION: influenzae B and E6 from Human papilloma virus type
OTHER INFORMATION: 16)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Local
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     136 INDITLECV 144
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   136 IHDIILECV 144
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 1 IHDIILECV 9

Publication No. US20040172684A1

GENERAL INFORMATION:

APPLICANT: Kovalic, David K.

APPLICANT: Zhou, Yihua

APPLICANT: Cao, Yongwei

TITLE OF INVENTION: Nucleic Acid Molecules and Other Molecules Associated With

TITLE OF INVENTION: Plants and Uses Thereof For Plant Improvement

FILE REFERENCE: 38-21(53535)B

CURRENT APPLICATION NUMBER: US/10/767,701

CURRENT FILING DATE: 2004-01-29

NUMBER OF SEQ ID NOS: 63128

SEQ ID NO 36891

LENGTH: 297

TYPE: PRT

ORGANISM: Sorghum bicolor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      밁
